Precision Engineering for Aerospace Applications

In aerospace, every component matters. From engine systems to critical fluid and air connections, reliable clamping solutions play an important role in supporting safety, performance, and operational reliability.

At Invicta Clamps, we are inspired by the engineering excellence and precision demanded by the aerospace industry. We believe in developing clamping solutions built around the needs of demanding applications, where quality, durability, and consistency are essential.

INVICTA CLAMPS — Engineered for Demanding Applications.

Constant tension clamps

Temperature changes put commercial vehicle hose connections to the test.
Constant tension clamps use spring action to help maintain clamping force as hoses expand, contract and settle—supporting reliable connections in cooling and selected charge-air applications.
Invicta Clamps supplies constant torque worm drive, spring band and spring-loaded T-bolt clamps to suit different application requirements.

INVICTA CLAMPS

NEWSLETTER October 2026 Edition

Secure connections. Reliable support.

Invicta Clamps offers a comprehensive range of exhaust clamps for trucks, buses and commercial vehicles under our Invicta Clamps brand.

From U-bolt and band clamps to V-band clamps and exhaust support brackets, our range serves diverse exhaust assembly and replacement requirements.

✔️ Multiple designs, sizes and material options
✔️ Solutions for exhaust connections and mounting
✔️ Custom manufacturing to customer drawings and specifications

Looking for a specific clamp? Send us your drawing, sample or part reference for a quotation.

Invicta Clamps × RexFlow

We're pleased to announce a collaboration between Invicta Clamps and technology startup RexFlow to digitise and connect our manufacturing and business operations.
The collaboration will focus on inventory visibility, purchase orders, production requirements and customer order tracking—helping our teams reduce manual work, improve traceability and make better-informed decisions.

By combining Invicta Clamps' manufacturing experience with RexFlow's customised software solutions, we aim to build practical digital tools around the way our business works.

Manufacturing expertise. Connected workflows.
